Peja: In Memoriam

Peja was one of the oldest males in the group of 39 Colton tigers that arrived at ARK 2000 in 2004 — one of the largest tiger rescues in history. He was so ill when he first arrived we kept him in Galt under constant surveillance for three months. After his recovery, and relocation to ARK 2000, he was able to enjoy several years in a lovely wooded habitat.

Thank you to his keepers for all the love and care he received.

Rest in Peace, Peja.
